

A SIMPLE - HIGHLY EFFECTIVE MOPPING SYSTEM

Place

SIMPLE & EFFECTIVE

The PerfectClean Flat Mop system provides a whole new cleaning experience.

Depending upon the task at hand the flat mop can be: rolled up, placed in a clean bucket, disinfectant is added. The flat mop is squeezed out prior to use (LaRoche method); used damp straight out of the washer *or*; mist lightly using a spray bottle *or*; the floor can be misted. Any one of these methods is highly effective.

Another significant advantage, especially when used in hotels, long term care and healthcare facilities, the flat mop can be changed-out at every washroom patient room and every. Cross contamination associated with material transfer is virtually eliminated.

The PerfectClean flat mop system comes in various sizes from 11" up to 25" wide, including hardware, a wide range of wipers & accessories.
